DETAILED ACTION

This is a response to the amendment + remarks filed on 11/20/06.

- Claims 1-18 are pending.
- After thoroughly considering the amendment + remarks, the previous rejections and/or allowable subject matter have been withdrawn in view of the amendment + remarks. After thoroughly considering the amendment + remarks, the examiner finds that a restriction is required for this application because the claimed groups recite different subject matters, see the followings.

Election/Restrictions

This application contains claim groups directed to the following patentably distinct species of the claimed invention:

Group	Invention
I.	Claims 1-12 drawn to a method of designing a logic circuit to provide a predetermined logical operation (Class 716 Subclass 18)
II.	Claims 13-18 drawn a circuit design method utilizing a logic synthesis tool (Class 716 Subclass 2).

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of

Art Unit: 2825

the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).
